**Campaign Spending:** [List of Filers](#)

I have been a Hawaii resident for more than thirty years. As a member at-large of the Waipahu Neighborhood Board, I am aware of the problems and needs of the district. If elected, I will work with commitment, dedication and enthusiasm to make Waipahu a better place to live in. I am running as a Republican because I feel very strongly that Hawaii needs a stronger two-party system to make government more responsive to the needs of the people. The process of check and balances works more effectively if there is an equal representation of both parties 'at the Legislature. I favor legislation that would allocate more funds for the departments of education and human services. These departments need sufficient funds to run their programs more effectively. The state judicial system must be overhauled to impose stringent punishment for crime offenders. As a community-oriented person, I am a member of different organizations including the Waipahu Community Association. I received my BA in Journalism/Political Science and MA in Political Science from the University of Hawaii at Manoa. I was a law student in Manila before immigrating to the United States in the 70s. A former city employee, I now help run a small family business.
